

## Brunton Miller

Jim Young a senior partner of Brunton Miller says.....

"PowerRetrieve has accomplished what we set out to do. Scanning incoming and outgoing documents means PowerRetrieve gives fast access to client information when required at the touch of a button, which in turn allows Brunton Miller to deal with client enquires more effectively. There is no need to waste time looking for paper files any more.

An unexpected bonus is that we have improved our cash-flow, as we also scan all our invoices into PowerRetrieve which allows the accounts department to quickly and easily locate accounts that need to be chased.

PowerRetrieve has proven to be a sound business decision."
