

Johnson Fleming

Group Pensions | Group Risk and Healthcare | Service Provision

Johnson Fleming purchased PowerRetrieve from InfoCAP Technologies in 2010 to manage our entire client filing system. As part of the installation project, we needed to scan our backlog of business files, which equated to approximately 600,000 pages.

We approached InfoCAP to see if they could recommend a company to carry out the work for us. Thankfully, InfoCAP told us that they had been considering setting up their own back scanning bureau to offer the service to their customers and would be happy to push forward with their plans in order to take on the work themselves.

They put forward a project plan to minimise the disruption on our daily work schedule which gave us the confidence to start the project in February 2011. The whole process was well executed in a timely manner and we would have no hesitation in recommending them to anyone considering a back scanning project.

Tom Claridge - Director of IT, Systems & Processes
