## Wood & Disney

Lost files are a thing of the past saving me an unknown but probably substantial amount of time and money.

Misfiled letters are also a thing of the past; again this saves me a further unknown amount.

I no longer employ a filing clerk saving me a tangible salary every month.

I no longer have a warehouse for archiving 7 years of back files, again saving me cash.

The clutter and mess associated with paper all around the office has simply disappeared so the staff are happier now in an uncluttered work space.

Plus of course it helped us to win a local Business Award in Information Technology.

"A fantastic piece of software"
